* Part time

Meteorological and Geoastrophysical Abstracts is a monthly publication presenting, in English, current meteorological and geoastrophysical abstracts gleaned from foreign and domestic literature.

Meteorological & Geoastrophysical Abstracts

Publication Office
American Meteorological Society
45 Beacon Street, Boston, MA 02108

Editorial Office
P.O. Box 1736
Washington, D.C. 20013
Telephone: (202) 546-6734

METEOROLOGICAL AND GEOASTROPHYSICAL ABSTRACTS (ISSN 0026-1130) is published monthly by the American Meteorological Society, 45 Beacon Street, Boston, MA 02108. Second class postage paid at Boston, MA, and additional mailing offices. Address all business communications, inquiries, orders, and changes in address to the Executive Director, American Meteorological Society, 45 Beacon Street, Boston, MA 02108. Exchanges and reprints may be sent directly to P.O. Box 1736, Washington, D.C. 20013. POSTMASTER: Send address changes to Meteorological and Geoastrophysical Abstracts, 45 Beacon Street, Boston, MA 02108.

Subscription Rates
Government agencies and industrial, commercial, scientific, and research organizations, $400.00. Educational institutions and public libraries, $200.00. Back volumes: Vols. 16–31 (1965–1980), same as above. Vols. 1–15 (1950–1964), $50.00 per vol.; $10.00 per issue. Special price, Vols. 1–10 (1950–1959), complete set, $200.00. Add $10.00 per volume for subscriptions outside U.S.

ERRATA

Volume 31, 1980

31.1 -91	Title: *change* “Obüyektivnyy” to “Ob″yektivnyy” and “territoreyey” to “territoriyey.”
31.1 -98	Title translation: *change to* “Calculation of the forecast accuracy in a model of the atmosphere–ocean system with a large number of degrees of freedom.”
31.1 -137	Author: *change* “Zhe-ming, Chen” to “Chen, Zhe-ming.”
31.1 -160	Title: *change* “okuzhayushchey” to “okruzhayushchey.”
31.1 -253	Title: *change* “O–115-km” to “0–115-km.”
31.1 -400	Author: *change* “Pătăchie, Julia” to “Pătăchie, Iulia.”
31.1 -486	Title translation: *change* “Cîndrelu” to “Cindrel.”
31.1 -499	Title: *change* “rasseyvayushchuyu” to “rasseivayushchuyu.”
31.1 -596	Author: *change* “Gunther, H.” to “Günther, H.”
31.2 -120	Author: *change* “Yammoto, T.” to “Yamamoto, T.”
31.2 -251	Title translation: *change* “sphere” to “region.”
31.2 -337	Abstract and Subject Heading: *change* “Hellinikon” to “Hellenikon.”
31.2 -365	Author: *change* “Denouth, A.” to “Denoth, A.”
31.2 -447	Title: *change* “from X- and UV observations” to “X-ray and UV observations.”
31.2 -540	Subject Heading: *change* “Currents on straits” to “Currents in straits.”
31.2 -553	Title, Abstract, and Subject Heading: *change* “Gulf of Elat” to “Gulf of Elath.”
31.3 -62	Corporate author: *change* “National Climatic Center, Asheville, N.C.” to “United States. National Oceanic and Atmospheric Administration, Environmental Data and Information Center, National Climatic Center, Asheville, N.C.”
31.3 -66	Title: *insert* “1979” after “Vedráttan.”
31.3 -118	Author: *change* “Buendia, C.E.” to “Buendía Carrera, Enrique J.”
31.3 -160	Author: *change* “Duuren, H. Van” to “Van Duuren, H.”
31.3 -301	Title: *change* “Bedetung” to “Bedeutung.”
31.3 -397	Title translation: *change* “Agriclimatic” to “Agroclimatic.”
31.3 -426	Author: *change* “Wernik, W.” to “Wernik, Andrzej W.”
31.3 -458	Title: *insert* “of the Earth” after “parameters.”
31.3 -464	Title translation: *change* “the maximum values of low probabilities” to “the low probabilities of maximum values.”
31.3 -596	Title, Abstract, and Subject Heading: *change* “Gulf of Elat” to “Gulf of Elath.”
31.4 -6	Title translation: *change* “Reports” to “Report.”
31.4 -69	Title translation: *change* “forecasing” to “forecasting.”
31.4 -115	Title: *change* “vybrsov” to “vybrosov.”
31.4 -148	Title: *change* “Vozdukhdeniye” to “Vozbuzhdeniye.”
31.4 -155	Title translation: *change* “repeatly” to “repeatedly.”
31.4 -157	Author: *change* “Krasnopolskiy, V. A.” to “Krasnopol’skiy, V. A.”
31.4 -171	Authors: *change* “Xian-ling, Long” to “Long, Xian-ling” and “Jie-chang, Hou” to “Hou, Jie-chang.”
31.4 -172	Author: *change* “Zhe-ming, Chen” to “Chen, Zhe-ming.”
31.4 -515	Title: *change* “Seeisgrenze” to “Seeeisgrenze.”
31.4 -562	Title: *change* “proboy” to “proboi.”
31.5 -73	Title translation: *change* “phenology of fruit woody plants” to “phenology of woody fruit plants.”
	Abstract and Subject Heading: *change* “Trsnice” to “Trsice.”
31.5 -267	Author: *change* “Philippov, V. L.” to “Filippov, V. L.”
31.5 -480	Subject Heading: *change* “Turbuence” to “Turbulence.”
31.5 -500	Title translation: *change* “waves of whistlers” to “whistler waves.”
31.5 -597	Author: *change* “Kuo, Yi-Yo” to “Kuo, Yi-Yu.”
31.6 -5	Title translation: *change* “Reports” to “Report.”
31.6 -48	Serial note: *insert* “[44 p.]” after “1979.”
31.6 -188	Abstract and Subject Heading: *change* “Heiss Island” to “Hayes Island.”
31.6 -195	Title: *change* “Model’sutochnykh” to “Model’ sutochnykh.”
31.6 -209	Title translation: *change* “Ration” to “Ratio.”
31.6 -234	Abstract and Subject Heading: *change* “Dixon Island” to “Dickson Island.”
31.6 -318	Author: *change* “Smoktiy, O. L.” to “Smoktiy, O. I.”
31.6 -359	Author: *change* “Vasilova, R. N.” to “Basilova, R. N.”
31.6 -376	Abstract and Subject Heading: *change* “Heiss Island” to “Hayes Island.”
31.6 -388	UDC (geographic): *change* “(99)” to “(99:42).”

AN ALPHABETICAL LIST OF BIBLIOGRAPHIES PUBLISHED IN PART II OF *METEOROLOGICAL AND GEOASTROPHYSICAL ABSTRACTS* (UNTIL 1960, *METEOROLOGICAL ABSTRACTS AND BIBLIOGRAPHY*), VOL. 1, NO. 1, JAN. 1950–VOL. 15, NO. 12, 1964

Acoustical Propagation, 1(10), 1950; 10(7), 1959
Aerobiology, 1(2), 1950
Agricultural Meteorology, 10 (Supplement No. 3), 1959
Airglow, 8(2), 1957; 11(11), 1956
Albedo, 8(7), 1957
Arctic Synoptic Meteorology, 7(1), 1956
Atmospheric Dynamics and Circulation, 12(12), Pt. 3, 1961
Atmospheric Pollution, 1(1), 1950
Auroral Physics, 4(10), 1953; 5(3), 1954; 12(1,2), 1961

Balloons, 5(5), 1954
Bibliographies, 6(1,2), 1955
Brooks, C. E. P., Works of, 10(1), 1959

Carbon Dioxode, 3(2), 1952
Climate of Arctic, 5(9), 1954
Climate of Argentina, etc., 3(3), 1952
Climate of Australia, 4(4), 1953
Climate of Central Africa 3(8), 1952
Climate of Enclosed Spaces, 7(2), 1956
Climate of Middle East, 2(6), 1951
Climate of Near East, 2(5), 1951
Climate of Northeast Africa, 2(10), 1951
Climate of Northwest Africa, 3(1), 1952
Climate of Pacific, 4(9), 1953
Climate of Southeast Asia, 5(2), 1954
Climatic Changes, 1(7), 1950; 15(11,12), 1964
Cloud Physics, 1(3), 1950; 6(6), 1955; 13(3), 1962
Condensation Trails, 2(9), 1951
Constants, Nomograms, etc., 2(4), 1951
Cooling Power, 6(11), 1955
Cosmic Rays, 7(3,4), 1956; 9(9), 1958; 13(4), 1962; 14(10,11), 1963

Dew, 3(4), 1952

Energy Exchange, Sea–Atmosphere, 13(5), 1962
Evaporation, 1(11), 1950; 10(8), 1959
Evapotranspiration, 10(9,10), 1959

Forecast Verification, 11(7), 1960
Forecasting, 12(12, Pt. 1), 1961
Forecasting Special Elements, 8(3), 1957
Forest Micrometeorology, 8(4), 1957
Frost, 4(3), 1953

Geomagnetism, 9(10,11), 1958; 13(2), 1962
Glaze and Rime, 3(10), 1952

Hail, 1(4), 1950
Humidity Instruments, 13(12), 1962
Hydrometeorological Forecasting, 8(5), 1957; 10 (Supplement No. 2), 1959

Icing, 1(9), 1950
Industrial Meteorology, 5(10), 1954
Instruments and Techniques, 10 (Supplement No. 1), 1959
Inversions, 7(6), 1956
Ionosphere, 6(4), 1955; 11(4,5,6), 1960; 13(6), 1962; 13(10), 1962; 15(1), 1964; 15(12), 1964

Jet Stream, 4(7), 1953

Lightning, 14(9), 1963
Limnology, 12(3), 1961
Long-Range Forecasting, 2(1,2), 1951; 9(7), 1958
Lunar Influences, 14(12), 1963

Medical Meteorology, 8(11), 1957
Meteors, 8(8), 1957
Mountain Meteorology, 2(11), 1951

Noctilucent Clouds, 15(4), 1964
Nuclei, 6(8,9), 1955; 15(6), 1964
Numerical Forecasting, 5(6), 1954; 8(6), 1957; 11(3), 1960; 14(6), 1963

Objective Forecasting, 3(5), 1952
Ocean Waves, 5(11), 1954
Ocean Waves and Currents, 9(4), 1958; 13(9), 1962; 15(5), 1964
Oceanographic Instruments, 14(4,5), 1963
Oceanographic Meteorology, 5(1), 1954
Ozone, 10(5,6), 1959

Physical and Dynamic Oceanography, 9(5,6), 1958; 12(12, Pt. 2), 1961
Planetary Atmospheres, 12(9,10,11), 1961
Precipitation, 10 (Supplement No. 2), 1959
Precipitation Chemistry, 12(7), 1961

Radar Meteorology, 2(8), 1951; 6(7), 1955; 9(8), 1958; 11(8), 1960; 14(2), 1963
Radiation Bioclimatology, 4(8), 1953
Radiation Data, 5(7), 1954
Radio Astronomy, 9(1), 1958; 14(7,8), 1963; 15(9), 1964
Radioactivity in the Atmosphere, 7(5), 1956; 9(3), 1958; 13(7,8), 1962; 15(8), 1964
Reference Works, 11(1), 1960
Rocket Meteorology, 11(9), 1960

Satellite Meteorology, 11(10), 1960; 14(3), 1963; 15(2,3), 1964
Sferics, 4(11), 1953; 10(4), 1959
Snow Micrometeorology, 7(7,8), 1956
Soil Moisture, 10(3), 1959
Soil Temperature, 2(3), 1951
Solar Astrophysics, 9(2), 1958
Solar Events, 13(11), 1962
Solar Radiation, 15(10), 1964
Solar Weather Relationships, 8(1), 1957
Special Winds, 2(7), 1951
Storm Surges, 6(3), 1955
Stratus Forecasting, 3(6), 1952
Subsurface Ocean Currents, 15(5), 1964

Textbooks, 11(2), 1960
Thunderstorms, 1(8), 1950
Tornadoes, 1(5), 1950; 10(2), 1959
Tropical Cyclones, 7(9,10,11), 1956
Tropopause, 5(4), 1954
Tropospheric Propagation, 8(9,10), 1957
Turbulence, 3(11), 1952; 4(1,2), 1953

Upper Atmosphere Humidity, 12(8), 1961
Upper Atmosphere Photochemistry, 6(5), 1955
Upper Atmosphere Structure, 12(4,5,6), 1961
Upper Atmosphere Winds, 4(5,6), 1953
Urban Climatology, 3(7), 1952

Van Allen Belts, 13(1), 1962
Vertical Motion, 5(8), 1954
Visibility, 3(9), 1952
Volcanic Dust, 1(6), 1950

Weather Modification, 1(3), 1950; 6(10), 1955; 11(12) 1960; 13(3), 1962; 14(1), 1963; 15(6,7), 1964
Wind Waves and Swell, 5(11), 1954

* Includes pertinent publications issued by various U.S. Government departments and agencies.

EXPLANATIONS

Location of material: For most entries, a symbol is given for at least one library where the material may be found. The **Symbols of American Libraries,** 10th ed., rev., is the source of most of the symbols used. No symbols are available for the current library acquisitions from the American Geophysical Union and the National Oceanographic Data Center. Frequently used symbols are given below.

CaOON:	National Science Library, National Research Council, Ottawa, Canada.
CLU:	Univ. of CA., Los Angeles
CU:	Univ. of CA., Berkeley
CU-S	Univ. of CA., Scripps Inst. of Ocean., La Jolla
DAS:	NOAA, Library and Information Services Div., Rockville, MD
DGS:	U.S. Geological Survey Library, Wash., D.C.
DLC:	Library of Congress, Wash., D.C.
DNAL:	National Agricultural Library, Wash., D.C.
DN-HO:	U.S. Naval Oceanographic Office Library, Suitland, MD

Geographic locations are in the English form; for example, Moscow not Moskva. Titles are in the language of the original articles unless otherwise stated. Slavic (Cyrillic) titles are transliterated into the Roman alphabet.

Abbreviations: Titles of periodicals are not abbreviated, as a rule. The word or abbreviation for Volume (Tom, Band, Jahrgang, Ano, etc.), for Number (Heft, Fascicule, Vypusk, etc.), and for page or pages is omitted from most entries. Thus, an entry will read as follows: *Meteorologische Rundschau*, 19(1): 1–7, Jan./Feb. 1966. This indicates that the article appeared in *Meteorologische Rundschau*, Jahrgang 19 (Vol. 19), Heft 1 (No. 1), pages 1–7, Jan./Feb. 1966.

Abstracting credits are noted by initials of *MGA* staff members or *Auth.* for author abstracts.

ERRATA

(*Continued from page ii*)

31.6 –392	Abstract and Subject Heading: *change* "Heiss Island" to "Hayes Island."
31.6 –394	Author: *change* "Karol, I. L." to "Karol', I. L."
31.6 –480	Author: *change* "Alexandrov, Yu. N." to "Aleksandrov, Yu. N."
31.6 –494	Title: *change* "ionosphare" to "ionosphere."
31.6 –562	Authors: *change* "Zaneveld, J. Ronald V." to "Zaneveld, J.; Ronald, V." Affiliation: *change* "both" to "all."
31.7 –149	Title: *change* "Gametag" to "GAMETAG."
31.7 –155	Author: *change* "Fejer, B. J." to "Fejer, B. G."
31.7 –186	Author: *change* "Vũ bôi Kiem" to "Kiem, Vũ bôi."
31.7 –199	Title: *change* "Frontongenetic" to "Frontogenetic."
31.7 –218	Author: *change* "Pérez-de-Teljada, H." to "Pérez-de-Tejada, H."
31.7 –229	Title translation: *change* "subartic" to "subarctic."
31.7 –431	Subject Heading: *change* "Visibility–precipitation relationships" to "Visibility–precipitation relationships."
31.7 –424	Author: *change* "Zege, Ye. P." to "Zege, E. P."
31.7 –486	Author: *change* "Ksanfomality, L. V." to "Ksanfomaliti, L. V."
31.7 –549	Author: *change* "Barsharinov, A. Ye." to "Basharinov, A. Ye."
31.8 –108	Title: *change* "Stickoxiden." to "Stickoxiden, ..."
31.8 –160	Author: *change* "Kanter, H. J." to "Kanter, H.-J."
31.8 –216	Author: *change* "Pavlov, V. E." to "Pavlov, V. Ye."
31.8 –230	Author: *change* "Morshita, I." to "Morishita, I."
31.8 –251	Author: *change* "Ariel', N. Z. " to "Ariyel', N. Z."
31.8 –340	Subject Heading: *change* "Luni-solar" to "Lunisolar."
31.9 –72	Title translation: *change* "Wator" to "Water."
31.9 –113	Subject Heading: *change* "GARP Atlantic Tropical Environment" to "GARP Atlantic Tropical Experiment."
31.9 –163	Subject Heading: *change* "ionsophere" to "ionosphere."
31.9 –181	Abstract and Subject Heading: *change* "Narssarssuaq" to "Narsarssuak."
31.9 –283	Authors: *change* "Hui-ding, Wu" to "Wu, Hui-ding"; "Xiaoyang, J." to "Ji, Xiaoyang"; and "Chuncheng, Y." to "Yang, Chuncheng."
31.9 –369	Subject Heading: *change* "Quarternary climates" to "Quaternary climates."
31.0 –517	Author: *change* "Sievers, Helmuth" to "Sievers, Hellmuth."
31.10–18	Author: *change* "Zenghao, Qin" to "Qin, Zenghao."
31.10–228	Author: *change* "Bridgeman, H. A." to "Bridgman, H. A."
31.10–233	Title translation: *change* "spectral brightness reflected radiation" to "spectral brightness of reflected radiation."
31.10–355	Affiliation: *change* "CO. Univ." to "Columbia Univ."
31.10–467	Author: *change* "Dubinin, Ye. M." to "Dubinin, E. M."
31.10–568	Authors: *change* "Zhouwen, Yu." to "Yu, Zhouwen"; "Decai, Jiang" to "Jiang, Decai"; and "Dacuo, Zhang" to "Zhang, Dacuo."
31.11–81	Author: *change* "Batka, Mihail" to "Batka, Michal."
31.11–118	Title: *change* "spektrosskopii" to "spektroskopii."
31.11–175	Abstract and Subject Heading: *change* "Heiss Island" to "Hayes Island."
31.11–276	Author: *change* "Koren, V. I." to "Koren', V. I."
31.11–420	Author: *change* "Federov, Ye. K." to "Fedorov, Ye. K."
31.11–432	Author: *change* "Shao-wu, Wang" to "Wang, Shao-wu" and "Szu-chung, Cheng" to "Cheng, Szu-chung."
31.11–588	Title: *change* "data (DB1)" to "data buoy (DB1)."
31.12–105	Corporate author: *change* "Forecasting Group, Shanghai Meteorological Bureau" to "Shanghai, China. Meteorological Bureau Forecasting Group."
31.12–128	Author: *change* "Lushkin, V. V." to "Lukshin, V. V."
31.12–134	Title: *change* "Luxemburg" to "Luxembourg."
31.12–245	Author: *change* "Kubato, Isao" to "Kubota, Isao."
31.12–258	Author: *change* "Demidov, E. F." to "Demidov, Ye. F."
31.12–288	Author: *change* "Ginz'burg, Ye. A." to "Ginzburg, Ye. A."
31.12–300	Title: *change* "nastbpvaneto" to "nastupvaneto."
31.12–314	Title: *change* "Snow-soil" to "Snow–soil."
31.12–315	Author: *change* "Federov, K. N." to "Fedorov, K. N."
31.12–427	Author: *change* "Angouridakis, B. E." to "Angouridakis, V. E."
31.12–580	Author: *change* "Federov, K. N." to "Fedorov, K. N."
31.12–594	Author: *change* "Federov, K. N." to "Fedorov, K. N."

AUTHOR INDEX

Note: In this index, author entries are arranged alphabetically and, under each author, titles are arranged alphabetically by the first word (excluding articles) of the original title. Translated titles are placed in brackets after foreign language titles. Authors whose names begin with an article or preposition (de, di, le, la, van, etc.) are generally indexed under that article or preposition. Cross references indicate variations from that practice, or possible alternate entries. Multiple-author titles are listed under the first author, and the coauthors are entered after the title.

A

- **Aaby, Bent**
  - Cyclic changes in climate during 5,500 yrs. reflected in Danish raised bogs, 31.5–436
- **Aagaard, Knut**
  - Polar oceanography, Pt. 1, Arctic Ocean, 31.10–509
  - Saline water on the northern Alaskan shelves (*with* **Tripp, R. B.**), 31.9–548
  - *See also* **Swift, J. H.**, 31.8–546
- **Aase, J. K.**
  - Stubble height effects on seasonal microclimate, water balance, and plant development of no-till winter wheat (*with* **Siddoway, F. H.**), 31.7–407
- **Abbi, S. D. S.**
  - Estimation of water balance of Mahanadi catchment up to Hirakud dam site (1962–1966) by Thornthwaite's technique (*with* **Malhotra, A. K.** and **Srivastava, K. K.**), 31.2–333
- **Abdel Vakhab, M. M.**
  - Conservation of adiabatic invariants as a criterion for evaluation of barotropic schemes, 31.7–87
- **Abdu, M. A.**
  - Particle ionization rates from total solar eclipse rocket ion composition results in the South Atlantic geomagnetic anomaly (*with* **Sorbral, J. H. A.** and **Batista, I. S.**), 31.1–183
- **Abdulla, S.**, *see* **Milford, J. R.**, 31.1–339
- **Abdussamatov, H. I.**
  - On mass flow in a complex sun spot, 31.7–512
- **Abe, Tomosaburo**, *see* **Moritani, M.**, 31.8–509
- **Abel, P. G.**
  - Improved model for the calculation of longwave flux at 11 μm (*with* **Gruber, A.**), 31.3–271
- **Abele, Gunars**
  - Mass water balance during spray irrigation with waste water at Deer Creek Lake land treatment site (*with* **Brockett, B. E.** and **McKim, H. L.**), 31.8–272
- **Abernethy, C. L.**, *see* **Treloar, P. D.**, 31.11–596
- **Abhyankar, V. P.**, *see* **Chowdhury, A.**, 31.4–332
- **Abi-Ghanem, G. V.**
  - Event-based model of recharge from an ephemeral stream (*with* **Duckstein, L.** and **Flug, M.**), 31.8–448
- **Abraham-Shrauner, B.**, *see* **Ling, K. M.**, 31.4–255
- **Abramov, R. V.**
  - Processes on various scales and their interaction in variations of the meteorological parameters over the Atlantic (*with* **Gushchin, O. A.**), 31.7–6
- **Abrányi, Andor-Pletser**
  - Kulonbozo kukorica hibridek idojarasi igenye [Weather requirements of various maize hybrids] (*with* **János-Szalai, Dezsőné**), 31.3–409
  - A talajhőmérséklet hatása a kukorica kezdeti fejlődésére [Influence of soil temperature on the early development of maize] (*with* **János-Szalai, Dezsőné**), 31.1–322
- **Abreu, Leonard W.**, *see* **Falcone, V. J., Jr.**, 31.11–9

Abreu, Vincent J.
  Airglow measurements of the variation of the $O^+(P\text{-}2)$ ionization frequency during solar cycle 21 (*with* **Hays, P. B.** and **Skinner, W. R.**), 31.7–215
  Influence of atmospheric absorption on satellite auroral observations (*with* **Hays, P. B.**), 31.2–46
  Wind measurements from an orbital platform using lidar system with incoherent detection: an analysis, 31.1–25
Abshire, N. L., *see* **Platt, C. M. R.**, 31.9–235
Accad, Y.
  Solution of the tidal equations for the M_2 and S_2 tides in the world oceans from a knowledge of the tidal potential alone (*with* **Pekeris, C. L.**), 31.10–583
Accerboni, E., *see* **Purga, N.**, 31.7–591
Achenbach, Hermann
  Klimagebundene Risikostufen der Ertragsbildung und räumliche Standortdifferenzierung der Landwirtschaft im Maghreb [Climatically linked risk grades of yield formation and spatial–locational differentiation of agriculture in the Maghreb], 31.7–318
Achtemeier, Gary L.
  On the temporal decay of the relationship between environmental covariates and convective rainfall for the Kansas high plains (*with* **Schickedanz, P. T.**), 31.6–86
Ackerman, Bernice, *see* **Sax, R. I.**, 31.7–316
Ackerman, M.
  In situ measurements of middle atmosphere composition, 31.2–140
Ackley, S. F.
  Sea ice studies in the Weddell Sea region aboard USCGC *Burton Island*, 31.3–522
Acoltzi, Tomás Morales, *see* **Buendía Carrera, E. J.**, 31.4–60
Acton, L. W., *see* **Mosher, J. M.**, 31.11–259
Acuña, Mario H.
  Magnetic field of Saturn: Pioneer-11 observations (*with* **Ness, N. F.**), 31.7–499
Adachi, T.
  Practical use of Berlyand theory on the atmospheric diffusion (*with* **Ohta, S.**), 31.2–291
  See also **Ohata, S.**, 31.3–120
Adam, Y.
  Belgian real-time system for the forecasting of currents and elevations in the North Sea, 31.2–555
Adamczyk, Z.
  Simple mathematical model of quantitative and qualitative processes occurring in the stream channel for water distribution control (*with others*), 31.2–473
Adamec, D.
  Developmental experiments to include vertical mixing processes in numerical model simulations of ocean anomalies (*with others*), 31.9–490
Adams, B.
  Simulation of transmissivity, storativity, and evapotranspiration in a digital model of a fissured dolomite aquifer near Ndola, Zambia (*with* **Kitching, R.**), 31.9–425
Adams, L. P.
  Use of photogrammetry in the study of the sea and the coasts, 31.9–447
Adar, E., *see* **Levin, M.**, 31.8–434
Addicks, J., *see* **Nieuwstadt, F. T. M.**, 31.3–178
Addison, P. A.
  Summer climate, microclimate, and energy budget of a polar semidesert on King Christian Island, N.W.T., Canada (*with* **Bliss, L. C.**), 31.11–436
Adem, Julián
  Low-resolution thermodynamic grid models, 31.4–75
Adetunji, J.
  Harmattan haze (*with* **Ong, C. K.** and **McGregor, J.**), 31.5–340
Adler, Robert F.
  Thunderstorm vertical velocities estimated from satellite data (*with* **Fenn, D. D.**), 31.2–328
Admirat, P.
  Natural and artificial increases in the ice-forming power of air in the Po Valley, 31.7–302
  Reproductibilité de la méthode de dépouillement des données grêlimétriques utilisées dans "Grossversuch IV" [Reprocessing of the method of gathering hailpad data used during Grossversuch IV] (*with others*), 31.9–345
  See also **Grenier, J. C.**, 31.3–343

Preliminary environmental impact study of the site proposed for PEP, 31.8–77
Report of the third session of the Precipitation Enhancement Project Board, Geneva, September 1979, 31.8–78
Resolutions of Congress and the Executive Committee, 31.8–17
Statistical design considerations for Precipitation Enhancement Projects, 31.8–79
World Weather Watch: consolidated report on the Voluntary Assistance Programme, including projects approved for circulation in 1978, 31.8–28
World Weather Watch: tenth status report on implementation, 31.5–13
World Weather Watch: WMO Tropical Cyclone Project, Subproject No. 6, Operational techniques for forecasting tropical cyclone intensity and movement, 31.12–103
World Meteorological Organization, Geneva, Executive Committee
Abridged report with resolutions of the 31st session of the Executive Committee, Geneva, May 28–1 June 1979, 31.12–18
World Meteorological Organization, Geneva, Regional Association VI (Europe)
Abridged final report of the seventh session, Prague, 17–25 October, 1978, 31.1–4
World Meteorological Organization, Geneva, WMO Bulletin
Significant meteorological events in 1978, Pt. 1, 31.5–41
World Meteorological Organization, World Climate Conference, 1st, Geneva, Feb. 12–13, 1979
Extended summaries of papers of the ... Conference, 31.9–10
Proceedings, 31.11–6
World Weather Program. [U.S. Participation]
Plan for fiscal year 1979, 31.5–14
Worley, S. J.
Oceanographic data collected aboard R/V *Melville* during January–February 1977 as a part of FDRAKE-77 (*with* **Nowlin, W. D., Jr.**), 31.10–515
Worthington, B. A., *see* **Ewing, J. A.**, 31.1–595; **Weare, T. J.**, 31.7–582
Worthington, L. Valentine, *see* **McCartney, M. S.**, 31.9–516
Wouters, D. S.
Factors determining the long-wave radiation exchange over natural surfaces (*with* **Impens, I.** and **Keppens, H.**), 31.10–227
Wright, C. E., *see* **Hamlin, M. J.**, 31.1–404
Wright, D. G.
On the stability of a fluid with specialized density stratification, Pt. 1, Baroclinic instability and constant bottom slope, 31.12–586
Wright, J. W.
Ocean wave–radar modulation transfer functions (*with* **Jones, W. L.** and **Plant, W. J.**), 31.9–568

  - *See also* **Plant, W. J.**, 31.11–600
- **Wright, Peter B.**
  - Approach to modeling climate based on feedback relationships, 31.10–377
  - Simple model for simulating regional short-term climatic changes, 31.6–453
  - Southern Oscillation, 31.4–198
- **Wright, Richard F.**
  - Sedimentation of detrital particulate matter in lakes: influence of currents produced by inflowing rivers (*with* **Nydegger, P.**), 31.12–555
- **Wrobel, B.**, *see* **Schnell, R. C.**, 31.12–383
- **Wu, C. S.**
  - Theory of terrestrial kilometric radiation (*with* **Lee, L. C.**), 31.10–435
- **Wu, F.-M.**, *see* **Judge, D. L.**, 31.7–501
- **Wu, Hui-ding**
  - Boundary layer model for the estimation of marine surface winds (*with* **Ji, X.** and **Yang, C.**), 31.9–283
- **Wu, Jin**
  - Distribution and steepness of ripples on carrier waves, 31.2–563
  - Oceanic whitecaps and sea state, 31.2–322
  - Spray in atmospheric surface layer, 31.8–279
  - Wind stress and water stress on lake ice (*with* **Tang, E.**), 31.10–508
  - Wind-stress coefficients over sea surface near neutral conditions: a revisit, 31.12–350
- **Wu, S. T.**, *see* **Steinolfson, R. S.**, 31.3–457
- **Wucknitz, Jürgen**
  - Influence of anisotropy on stress estimation by the indirect dissipation method, 31.2–203
- **Wübber, C.**
  - Two-dimensional seiches of the Baltic Sea (*with* **Krauss, W.**), 31.4–586
- **Wüst, Georg**
  - Stratosphere of the Atlantic Ocean: scientific results of the German Atlantic Expedition of the research vessel *Meteor*, 1925–27, Vol. VI, Section 1, 31.12–570
- **Wurtele, M. G.**
  - Fisher–Tippett representations of extreme rainfall and temperature data (*with* **Roe, J. M.**), 31.7–232
- **Wylie, Donald P.**
  - Application of a geostationary satellite rain estimation technique to an extratropical area, 31.6–31
  - Boundary layer observations of warm air modification over Lake Michigan, using a tethered balloon (*with* **Young, J. A.**), 31.4–399
- **Wyman, C. M.**, *see* **Patterson, E. M.**, 31.8–120
- **Wyngaard, J. C.**
  - Boundary layer physics and turbulence: observational aspects, 31.10–140
- **Wyrtki, Klaus**
  - Comments on the variability of the tropical ocean, 31.4–521
  - Response of sea surface topography to the 1976 El Niño, 31.4–536

X

- **Xin, Kiêu thi**, *see* **Bernhardt, K.**, 31.2–206

Y

- **Yaalon, Dan H.**
  - East Mediterranean trajectories of dust-carrying storms from the Sahara and Sinai (*with* **Ganor, E.**), 31.9–118
- **Yacowar, N.**
  - Use of percentage of possible sunshine data to prepare automated forecasts of sky cover and to verify plain language forecasts, 31.12–255
- **Yadav, A. K.**
  - Chemistry of rainwater and its contribution to nutrient input in forests of central India (*with* **Mishra, G. P.**), 31.5–396
- **Yagi, Tsuruhei**
  - Size distribution of snowflakes and graupel particles observed in Nagaoka, Niigata Prefecture (*with* **Seino, H.** and **Uyeda, H.**), 31.11–373
- **Yakhnin, A. G.**
  - Chastota poyavleniya siyaniy v polyarnoy shapke i oriyentatsiya vektora MMP [Frequency of auroral occurrences in the polar cap and orientation of the IMP] (*with* **Sergeyev, V. A.**), 31.6–472; 31.10–433
- **Yakovlev, A. A.**
  - Information content of measurements of the phase functions of brightness and polarization in the study of a spectrum of scattering particles, 31.11–141
  - Properties of the model component ranking solution of an inverse optical sounding problem, 31.6–32
  - Solution of inverse problems by the component ranking method in the presence of *a priori* information on the position and dimensions of the region of possible solutions, 31.12–22
  - Structure of information obtained by balloon optical sensing and its use for solution of the inverse problem, 31.6–33
- **Yakovleva, N. I.**

Prostranstvennaya struktura anomaliy urozhayev yarovoy pshenitsyi meteorologicheskikh kharakteristik po territorii SSSR [Spatial structure of anomalies of spring wheat harvests and meteorological characteristics in the U.S.S.R.], 31.12–485

Atmospheric dispersion studies
- Nieuwstadt, F. T. M., 31.9–279
- Sheih, C. M. et al., 31.12–331

Atmospheric disturbances
- Fraedrich, K. et al., 31.7–173
- Salby, M. L., 31.9–214
- White, G. H., 31.11–218

Atmospheric drag effects on satellites
- Noskov, B. N., 31.7–52

Atmospheric eddies
- Flierl, G. R. et al., 31.12–215
- Roads, J. O., 31.8–176

Atmospheric effects on astronomical observations
- Martys, C. R., 31.5–35

Atmospheric effects on radio-wave propagation
- Falcone, V. J., Jr. et al., 31.11–9

Atmospheric electric currents
- Mühleisen, R. et al., 31.8–349

Atmospheric electric field
- Boeck, W. L., 31.7–435

Atmospheric electricity
- Bucharest. Institutul de Meteorologie şi Hidrologie, 31.5–487
- Mühleisen, R. et al., 31.8–349

Atmospheric electricity–atmospheric pollution relationships
- Tammet, Kh. F., 31.11–136
- Tsunoda, Y. et al., 31.4–132

Atmospheric electricity conferences
- International Conference on Atmospheric Electricity, 5th, Garmisch-Partenkirchen, W.

Germany, Sept. 2–7, 1974, 31.2–10
Atmospheric electricity data
Warzecha, S., 31.8–27
Atmospheric electricity effects on biological processes
Reiter, R., 31.8–351
Atmospheric electricity effects on health
Bucharest. Institutul de Meteorologie şi Hidrologie, 31.5–487
Atmospheric electricity effects on man
Bucharest. Institutul de Meteorologie şi Hidrologie, 31.5–487
Reiter, R., 31.8–351
Atmospheric electricity in mountain regions
Reiter, R., 31.8–350
Atmospheric electricity instruments
Lane-Smith, D. R., 31.2–60
Atmospheric electricity measurements
Arol'd, M. U. et al., 31.12–493
Gordyuk, V. P. et al., 31.12–494
Atmospheric electricity–meteorological parameter relationships
Reiter, R., 31.8–350
Atmospheric electricity models
Roble, R. G. et al., 31.5–488
Atmospheric electricity research
Dibner, B., 31.7–436
Eden, H. F., 31.7–437
Hughes, J., 31.7–438
Reiter, R., 31.2–401
Atmospheric electricity theories
Roble, R. G. et al., 31.5–488
Atmospheric electricity variations
Raina, B. N. et al., 31.9–396
Atmospheric emissions
Murcray, D. G. et al., 31.8–217
Atmospheric energetics
Čadež, M., 31.1–225
Defant, F. et al., 31.2–220
Desyatkov, B. M., 31.7–140
Hayashi, Y., 31.9–205
Holopainen, E. et al., 31.9–207
Salby, M. L., 31.9–214
Trenberth, K. E., 31.1–572
Vasil'yev, V. F. et al., 31.3–222
Williams, R. G. et al., 31.7–417
Atmospheric evolution
Bernatowicz, T. J. et al., 31.11–105
Chen, Zhe-ming, 31.1–137
Izakov, M. N., 31.7–104
Levine, J. S., 31.12–126
Owen, T., 31.3–143
Ponnamperuma, C. (ed.), 31.12–127
Shimizu, M., 31.4–105; 31.4–106
Toupance, G. et al., 31.1–134
Vander Wood, T. B. et al., 31.9–93
Walker, J. C. G., 31.10–110; 31.5–122
Whitfield, M., 31.1–136
Atmospheric extinction
Lerfald, G. et al., 31.12–273
Mikhail, J. S., 31.6–333
Atmospheric gases
Crutzen, P. J. et al., 31.3–134
Atmospheric gravity waves
Eltayeb, I. A. et al., 31.6–274
Greene, G. E. et al., 31.4–180
Love, G. B., 31.8–250
Merrill, J. T. et al., 31.4–181
Panchev, S. et al., 31.7–170
Atmospheric heat balance
Kubota, I., 31.2–82
Atmospheric heat budget
Yueh, W. R. et al., 31.4–234
Atmospheric heating
Frank, W. M., 31.12–299
Stolarski, R. S. et al., 31.8–106
Atmospheric models
Cole, A. E. et al., 31.7–168
Rousseau, D., 31.12–19
Atmospheric moisture content
Viswanadham, Y. et al., 31.9–301
Atmospheric optical measurements
Johnson, R. W., 31.12–270
Atmospheric optics
Antyufeyev, V. S., 31.7–426
Pokrovskiy, O. M. et al., 31.6–337
Reshetnikova, I. S. et al., 31.3–425
Smerkalov, V. A., 31.10–417
Atmospheric optics conferences
Seminar on Optical Properties of the Atmosphere, Wash., D.C., March 30–31, 1978, 31.5–23
Atmospheric oscillations
Kadyshnikov, V. M., 31.11–202
Atmospheric oxygen
Cope, M. J. et al., 31.7–112
Atmospheric particulates
Cheng, R. J., 31.11–116
Atmospheric photochemical processes
Karol', I. L., 31.8–91
Miksad, R. W. et al., 31.8–98
Sellers, B. et al., 31.8–103
Atmospheric physics
Bullrich, K., 31.7–98
Sonntag, D., 31.1–215
Atmospheric physics meetings
International Association of Meteorology and Atmospheric Physics (IAMAP). Commission on Meteorology of the Upper Atmosphere (CMUA), 31.2–144
Atmospheric pollutant residence time
Hinds, M. K., 31.2–108
Schwartz, S. E., 31.5–149
Atmospheric pollution
Brimblecombe, P., 31.1–125
Dütsch, H. U. (ed.), 31.4–97
Electric Power Research Institute, Palo Alto, CA., 31.10–116
Gajendragadkar, S. K., 31.3–162
Izrael, Yu. A., 31.5–140
National Research Council. Panel on Nitrates, 31.3–10
Plesník, P., 31.9–111
Atmospheric pollution analysis
Aleynikov, M. S. et al., 31.11–111
Glushchenkov, V. I. et al., 31.11–118
Holdren, M. W. et al., 31.1–155
Krasov, V. I., 31.11–80
Mariño, M. et al., 31.2–118

Orographic effects on rainfall
Popa, A. et al., 31.1–408

Orographic effects on snow cover
Dickison, R. B. B. et al., 31.11–375

Orographic effects on snow melting
Obled, C. et al., 31.11–397

Orographic effects on temperature
Nkemdirim, L. C., 31.9–383

Orographic effects on thunderstorms
Beşleagă, N. et al., 31.4–216; 31.5–242

Orographic effects on troughs
Satyamurty, P. et al., 31.11–221

Orographic effects on turbulence
Bradley, E. F., 31.9–274

Orographic effects on weather
Semazzi, F. H. M., 31.9–83

Orographic effects on wind
Bradley, E. F., 31.9–274
Brand, S. et al., 31.2–241
Kozo, T. L., 31.11–334

Orographic influences
Richwien, B. A., 31.12–353

Orographic rainfall studies
Sakakibara, H., 31.8–285

Orographic waves
Avery, S. K. et al., 31.2–219
Béll, B., 31.1–364
Császár, M., 31.11–211
Fischer, G., 31.12–214
Malanotte Rizzoli, P. et al., 31.10–199; 31.10–200

Orographically induced vertical motion
Stoian, R. et al., 31.1–365

Outer ionosphere investigations
Mikhaylova, G. A. et al., 31.8–147

Outer radiation belt
Grigoryan, O. R. et al., 31.5–282

Outgoing radiation flux
Abel, P. G. et al., 31.3–271
Murakami, T., 31.11–247; 31.11–248
Pokrovskiy, O. M. et al., 31.6–337

Outgoing radiation intensities
Gutshabash, S. D., 31.12–259
Pyatovskaya, N. P. et al., 31.10–244

Oxidation
Altshuller, A. P., 31.6–105
Hegg, D. A. et al., 31.1–153

Oxygen-18/16 ratios in foraminifera
Williams, D. F. et al., 31.2–551

Oxygen-18/16 ratios in precipitation
Siegenthaler, U. et al., 31.11–362

Oxygen absorption spectra
Nicolet, M. et al., 31.8–129

Oxygen green lines
Petitdidier, M. et al., 31.6–341

Oxygen in exosphere
Serafimov, K. et al., 31.6–252
Yee, J. H. et al., 31.10–172

Oxygen in thermosphere
Kayser, D. C., 31.8–144

Oxygen lines
Llewellyn, E. J. et al., 31.6–340

Oxygen red line
Gogoshev, M. et al., 31.6–339

Oxygen variations in seawater
Matthaus, W., 31.12–578; 31.12–579

Ozone absorption by leaves
Wesely, M. L. et al., 31.5–123

Ozone amount
Davis, D. D. et al., 31.8–83

Ozone–atmospheric pollution relationships

Salinity maps
International Council for the

Exploration of the Sea, Charlottenlund Slot, Denmark, 31.8–499; 31.9–451; 31.9–452; 31.10–514; 31.12–569
Salinity of bays
Delille, D. et al., 31.8–587
Salinity of coastal waters
Ivanov, G. S. et al., 31.4–569
Salinity of irrigation water
Pels, S., 31.11–405
Walker, W. R. et al., 31.3–505
Salinity of sea ice
Mel'nichenko, N. A. et al., 31.6–525
Salinity of soil water
Mulcahy, M. J., 31.11–402
Pels, S., 31.11–405
Salinity profiles
Navrotskaya, S. Ye., 31.6–566
Salinity regime
Rochford, D. J., 31.3–582
Salinity structure
Simpson, J. J. et al., 31.2–535
Salinity variations
Stepanov, S. I., 31.11–591
Salinization of groundwater
Mercado, A., 31.8–450
Mulcahy, M. J., 31.11–402
Salt deserts
Lines, G., 31.4–496
Salt fingers
Tyvand, P. A., 31.10–490
Salt intrusion in estuaries
Ages, A., 31.3–600
Giese, G. L. et al., 31.6–600
Salt water infiltration
Gogel, T. et al., 31.7–524
Salt water intrusion into coastal aquifers
Andrews, R. W., 31.8–449
Mercer, J. W. et al., 31.8–451
Nyman, D. J., 31.8–452
Sa da Costa, A. et al., 31.8–453
Salt wedge studies
Hanawa, K. et al., 31.8–597
Saltation
Bagnold, R. A., 31.8–258
Greeley, R. et al., 31.7–488
Salyut-4
Bruns, A. V. et al., 31.6–485
Kondrat'yev, K. Ya. et al., 31.12–169
Loyevskiy, A. S. et al., 31.6–213
Yegorov, I. D. et al., 31.12–167
Salyut-5
Markov, M. N. et al., 31.6–175
Sand ripples
Treloar, P. D. et al., 31.11–596
Sand transport along shore
Inman, D. L., 31.9–597
Sand waves
Levashov, A. A., 31.9–553
Sand waves in rivers
Snishchenko, B. F., 31.10–496
Satellite acceleration
Mainguy, A.-M. et al., 31.1–261
Satellite airglow observations
Huffman, R. E. et al., 31.5–81; 31.11–62
Satellite albedo measurements
Henderson-Sellers, A., 31.10–232
Norton, C. C. et al., 31.3–267
Saunders, R. W. et al., 31.7–204
Sydor, M. et al., 31.3–86
Satellite and radar meteorology
Reynolds, D. W. et al., 31.1–37
Satellite auroral particle observations
Hardy, D. A. et al., 31.9–34
Satellite auroral radiation observations
Huffman, R. E. et al., 31.5–81
Satellite charged particle measurements
Bieber, J. W. et al., 31.1–294
Hovestadt, D. et al., 31.9–254
Kirsch, E. et al., 31.12–290
Kurt, V. G. et al., 31.6–349
Nagai, T. et al., 31.4–256
Shutte, N. M. et al., 31.6–358
Su, S.-Y. et al., 31.8–352
Satellite cloud observations
Shideler, D. H. et al., 31.6–423
Satellite cloud photograph analysis
Billing, H. et al., 31.6–62
Desbois, M. et al., 31.6–26
Hasler, A. F., 31.4–19
Hubert, L. F. et al., 31.1–26; 31.10–60
Lee, D. H., 31.1–388
Wiesner, K. et al., 31.7–53
Wylie, D. P., 31.6–31
Zwatz-Meise, V., 31.2–51
Satellite cloud photograph synoptic analysis
Bucur, G. et al., 31.5–79
Kochikova, P., 31.6–64
Murayama, N., 31.9–38
Wicker, J., 31.3–350
Zwatz-Meise, V., 31.6–78; 31.9–44
Satellite cloud photographs
United States National Oceanic and Atmospheric Administration, Environmental Data and Information Service, Wash., D.C., 31.9–41; 31.10–68; 31.10–69
Satellite cloud studies
Barrett, E. C. et al., 31.5–386
Satellite communication systems
Kleppe, J. A. et al., 31.5–53
Satellite conferences
International Conference on Spacecraft Charging Technology: 1978, U.S. Air Force Academy, Colorado Springs, CO., Oct. 31–Nov. 2, 1978, 31.3–18
Satellite data archives
Hoppe, E. R. et al., 31.4–3
Satellite data catalogs
United States National Oceanic and Atmospheric Administration. Environmental Data and Information Service, Wash., D.C., 31.2–1
Satellite data processing
Bailey, P. L. et al., 31.7–44
Udin, I. et al., 31.1–71
United States National Oceanic and Atmospheric Administration. National Environmental Satellite Service, Wash., D.C., 31.2–50
Satellite data recovery
United States National

Oceanic and Atmospheric Administration. National Environmental Satellite Service, Wash., D.C., 31.2–50

Satellite data utilization
Hoppe, E. R. et al., 31.4–3

Satellite density measurements
Marcos, F. A. et al., 31.6–151

Satellite detection of groundwater
Grumăzescu, H. et al., 31.12–527

Satellite detection of internal waves
Apel, J. R. et al., 31.9–589
Brown, O. B. et al., 31.7–593

Satellite electron observations
Antonova, A. Ye. et al., 31.5–276; 31.6–254
Blyudov, V. A. et al., 31.4–244
Decker, R. B. et al., 31.5–280
Ginzburg, Ye. A., 31.12–288
Hardy, D. A. et al., 31.9–34; 31.11–485
Kuznetsov, S. N. et al., 31.3–279
Nikolayeva, N. S. et al., 31.3–281

Satellite exospheric investigations
Keating, G. M. et al., 31.6–206
Kutiyev, I. et al., 31.6–250
Sanatani, S. et al., 31.9–264
Serafimov, K. et al., 31.6–252

Satellite exploration of upper atmosphere
Gelman, M. E. et al., 31.6–57
Hartmann, D. L., 31.6–162

Satellite extreme ultraviolet radiation measurements
Delaboudinière, J. P. et al., 31.6–320
Gilson, B. R. et al., 31.1–275
Hinteregger, H. E. et al., 31.6–201; 31.6–321

Satellite geomagnetic measurements
Newell, R. E. et al., 31.1–544

Satellite glacier surveillance
Ferrigno, J. G. et al., 31.2–495
Rott, H., 31.3–377

Satellite ice surveillance
Akagawa, M. et al., 31.7–541; 31.7–544
Campbell, W. J. et al., 31.8–483
Gernandt, H., 31.4–515
Kniskern, F. E., 31.10–61
McClain, E. P., 31.10–63
Udin, I. et al., 31.1–71
Wiesnet, D. R., 31.11–519

Satellite infrared radiation data analysis
Aoki, T., 31.1–325
Barnett, J. J. et al., 31.2–47
Chen, E., 31.1–324
Deschamps, P. Y. et al., 31.7–240
Ellrod, G., 31.11–340
Gille, J. C. et al., 31.9–122
Kästner, M. et al., 31.11–18
Kohri, W. J. et al., 31.2–49
Labitzke, K. et al., 31.1–318; 31.6–371
Legeckis, R. et al., 31.11–281
McClain, E. P., 31.10–64
Parikh, J. A. et al., 31.10–323
Runcanu, T. et al., 31.5–82
Schneider, S. R. et al., 31.8–43
Sickler, G. L. et al., 31.10–32
Stowe, L. L. et al., 31.7–21
Uspenskiy, A. B., 31.6–25
Vinogradov, V. V., 31.11–285
Weinreb, M. P., 31.12–31

Satellite infrared radiation measurements
Deuendorffer, A. C., 31.12–267
Sochnev, V. G. et al., 31.3–269
Weinreb, M. P. et al., 31.12–64
Wilson, R. G. et al., 31.6–66

Satellite instrumentation
Davis, N. E., 31.12–59
Zegowitz, V., 31.7–54

Satellite interplanetary magnetic field research
Russell, C. T. et al., 31.11–64

Satellite interrogation of automatic weather stations
Canada Weekly [Ottawa], 31.9–49

Satellite interrogation of buoys
Madelain, F. et al., 31.9–29

Satellite ionospheric electron temperature measurements
Mahajan, K. K. et al., 31.2–174

Satellite ionospheric interaction
Oya, H. et al., 31.4–161

Satellite ionospheric investigations
Anderson, D. N. et al., 31.9–148
Breig, E. L. et al., 31.9–153
Burke, W. J. et al., 31.6–183; 31.8–141
Bythrow, P. F. et al., 31.7–154
Dachev, Ts. P. et al., 31.6–189
Davies, K. et al., 31.12–175
Gérard, J.-C. et al., 31.9–249
Grebowsky, J. M. et al., 31.9–165
Harker, K. J. et al., 31.11–160
Hays, P. B. et al., 31.9–166
Heelis, R. A. et al., 31.11–161
Heron, M. L. et al., 31.2–166
Ivanov, G. V. et al., 31.6–204
Ivanov, V. M. et al., 31.3–216
Köhnlein, W. et al., 31.6–207
Kutiyev, I. et al., 31.11–168
Muldrew, D. B., 31.11–171
Oya, H. et al., 31.4–161; 31.8–149
Rodgers, G. L. et al., 31.12–179; 31.12–180
Sanatani, S. et al., 31.11–176
Schmidtke, G., 31.5–265
Sinno, K. et al., 31.4–167
Spenner, K. et al., 31.6–238
Temerin, M., 31.2–192
Tyagi, T. R. et al., 31.2–195
Vancour, R. P. et al., 31.12–40
Vondrak, R. R. et al., 31.10–170

Satellite magnetospheric investigations
DeCoster, R. J. et al., 31.1–286
Formisano, V., 31.11–187
Hartline, B. K., 31.8–39
Hones, E. W., Jr. et al., 31.5–512
Krimigis, S. M. et al., 31.10–181

Lazarev, V. I. et al., 31.10–182
Mozer, F. S. et al., 31.2–197
Williams, D. J. et al., 31.11–264

Satellite meteorology
Spahn, I., 31.11–65
Winston, J. S. (ed.), 31.10–70
Wisconsin. Univ., Madison, Dept. of Meteorology, 31.9–42

Satellite microwave radiation data analysis
Allison, L. J. et al., 31.6–444
Basharinov, A. Ye. et al., 31.3–50; 31.7–549
Beer, T., 31.7–45
Chang, A. T. C. et al., 31.4–18
Drobyshevich, V. I., 31.6–23
Jung, H. J., 31.12–34
Kidder, S. Q. et al., 31.9–292
Lovejoy, S. et al., 31.11–24
Njoku, E. G., 31.7–246; 31.7–247
Poon, R. K. L., 31.10–28
Rubio, R. et al., 31.1–70
Stanford, J. L., 31.12–30
Swift, C. T., 31.7–553
Wilheit, T. T. et al., 31.7–554; 31.11–67

Satellite observation of aerosols
Griggs, M., 31.12–145

Satellite observation of airglow
Gérard, J.-C. et al., 31.9–249
Hays, P. B. et al., 31.9–166
Thuillier, G. et al., 31.6–374

Satellite observation of atmospheric luminescence
Huffman, R. E. et al., 31.5–81

Satellite observation of atmospheric pollution
Allario, F. et al., 31.12–130
Nijland, J. A., 31.3–179
Staylor, W. F., 31.12–154

Satellite observation of auroras
Abreu, V. J. et al., 31.2–46
Dandekar, B. S., 31.1–509
Huffman, R. E. et al., 31.11–62
Murphree, J. S. et al., 31.10–65; 31.10–430
Rusch, D. W. et al., 31.8–368; 31.9–402
Sharp, W. E. et al., 31.1–508; 31.2–407

Satellite observation of clouds
Bunting, J. T., 31.11–57

Satellite observation of cyclones
Carleton, A. M., 31.5–234
Gaby, D. C. et al., 31.11–59
Junker, N. W. et al., 31.11–219

Satellite observation of flooding
Allison, L. J. et al., 31.6–444

Satellite observation of general circulation
Davis, N. E., 31.12–59

Satellite observation of hurricanes
Black, P. G. et al., 31.7–188
Pike, A. C., 31.7–191

Satellite observation of ice
Brooks, R. L. et al., 31.12–561

Satellite observation of lake water turbidity
Shuter, V. et al., 31.8–478

Satellite observation of lightning
Edgar, B. C., 31.7–46
Orville, R. E. et al., 31.1–505
Turman, B. N., 31.7–464
Workshop on the Need for Lightning Observations from Space, Tullahoma, TN., Feb. 13–15, 1979, 31.4–8

Satellite observation of ocean currents
Bernstein, R. L. et al., 31.12–596
Lutjeharms, J. R. E., 31.12–598
Parra, C. G. et al., 31.12–599

Satellite observation of ocean swell
Parsons, C. L., 31.2–562

Satellite observation of ocean waves
Beal, R. C., 31.11–599
Fedor, L. S., 31.8–38
Parsons, C. L., 31.2–569
Suchman, R. A. et al., 31.10–575

Satellite observation of oceanic circulation
Gaborski, P. D. et al., 31.12–581

Satellite observation of oceanic eddies
Vukovich, F. M. et al., 31.4–558

Satellite observation of oceanic fronts
Nesterczuk, G. N. et al., 31.9–507
Roden, G. I., 31.11–282
Tabata, S. et al., 31.11–284

Satellite observation of plankton
Quenzel, H. et al., 31.9–39

Satellite observation of plasmasphere
Chappell, C. R., 31.9–187
Davies, K. et al., 31.12–175
Sinno, K. et al., 31.4–167

Satellite observation of radiation belts
Kuznetsov, S. N. et al., 31.3–278

Satellite observation of sea level
Kahn, W. D. et al., 31.9–469
Marsh, J. G., 31.12–571

Satellite observation of sea surface topography
Brammer, R. F. et al., 31.9–472
Byrne, H. M. et al., 31.8–36
Cheney, R. E. et al., 31.12–574
Marsh, J. G., 31.12–571
Mather, R. S. et al., 31.9–473
Pullen, P. et al., 31.8–42
Smith, S. L., III et al., 31.8–44

Satellite observation of seawater color
Kim, H. H. et al., 31.8–507
Morel, A., 31.7–564
Shannon, L. V., 31.8–516
Viollier, M. et al., 31.7–565

Satellite observation of squall lines
Eddy, A. et al., 31.1–69
Fortune, M., 31.9–225

Satellite observation of state of sea
Brown, G. S., 31.2–567
Fedor, L. S. et al., 31.2–568
Gower, J. F. R. et al., 31.10–566

Satellite observation of synoptic situations
Berlin. Freie Univ., Institut für Meteorologie, 31.6–283

Satellite observation of thunderstorms
Pitts, D. E. et al., 31.1–246

Satellite observation of tornadoes
Hung, R. J. et al., 31.11–229
Satellite observation of tropical cyclones
Erickson, C. O., 31.1–104
Gaby, D. C. et al., 31.11–59
Satellite observation of turbulence
Temerin, M., 31.2–191
Satellite observation of VLF emissions
Russell, C. T., 31.8–377
Satellite observation of volcanic eruptions
Krueger, A. F. et al., 31.11–63
Satellite observation of wind
Canada Weekly [Ottawa], 31.9–18
Satellite observations of hailstorms
Reynolds, D. W., 31.10–358
Satellite optical observation techniques
Edgar, B. C., 31.7–46
Satellite orbit calculations
Colquitt, E. S. et al., 31.8–37
Satellite orbit perturbations
Manakov, Yu. M. et al., 31.7–209
Noskov, B. N., 31.7–52
Paál, A., 31.3–83
Satellite outgoing radiation measurements
Abel, P. G. et al., 31.3–271
Badayev, V. V. et al., 31.12–133
Fett, R. W. et al., 31.3–80
Murakami, T., 31.11–247; 31.11–248
Pyatovskaya, N. P. et al., 31.10–244
Saunders, R. W. et al., 31.7–204
Satellite ozone estimates
Millier, F. et al., 31.4–142
Satellite photograph analysis
Otterman, J. et al., 31.8–41
Satellite photograph rectification
Eckardt, M. et al., 31.10–56
Satellite photographs
United States National Oceanic and Atmospheric Administration, Environmental Data and Information Service, Wash., D.C., 31.1–72; 31.1–73; 31.5–8; 31.6–65; 31.12–63
Satellite photographs of auroras
Murphree, J. S. et al., 31.7–474
Satellite photography
Kondrat'yev, K. Ya. et al., 31.7–205
Satellite photometric observation
Murphree, J. S. et al., 31.10–65
Satellite precipitation measurements
Barrett, E. C., 31.1–68
Satellite proton measurements
Basilova, R. N. et al., 31.6–359
Satellite radar techniques
Beal, R. C., 31.11–599
Satellite radiation data analysis
Billing, H., 31.6–421
Clark, D. K. et al., 31.7–567

Satellite tracking
Donnelly, R. F. et al., 31.2–48
Satellite tracking of buoys
Cheney, R. E. et al., 31.11–531
Hansen, D. et al., 31.9–526
Harris, T. F. W. et al., 31.3–575
McNally, G., 31.9–533
Satellite upper atmosphere composition measurements
Köhnlein, W. et al., 31.1–177
Satellite upper atmosphere research
Gille, J. C., 31.2–143
Satellite uses
Engelhardt, W., 31.6–63
Johnson, D. S., 31.8–1
Satellite uses in agriculture
Bozó, P., 31.7–91
Fraysse, G., 31.12–61
Galli de Paratesi, S. et al., 31.12–60
Satellite uses in agrometeorology
Fraysse, G., 31.12–61
Satellite uses in climatology
Barrett, E. C., 31.11–56
Izrael, Yu. A., 31.1–426
Satellite uses in Earth sciences
Folving, S., 31.11–58
Satellite uses in forecasting
Cane, M. A. et al., 31.7–88
Edwards, R. L. et al., 31.7–47
Erickson, C. O., 31.1–104
Freeman, J. C., 31.7–48
Gentry, C. R. et al., 31.11–93
Graves, L. F. et al., 31.7–49
Muench, H. S., 31.12–92
Murayama, N., 31.9–38
Shkoda, M. et al., 31.6–82
Viezee, W. et al., 31.2–75
Satellite uses in geology
Gatto, L. W. et al., 31.11–60
Satellite uses in geomorphology
Schneider, S. R. et al., 31.8–43
Satellite uses in glaciology
Gatto, L. W. et al., 31.11–60
Satellite uses in hydrology
Galli de Paratesi, S. et al., 31.12–60
Gatto, L. W. et al., 31.11–60
Halliday, R. A., 31.10–58
Satellite uses in marine meteorology
Pierson, W. J., 31.6–139
Satellite uses in mesometeorology
Graves, L. F. et al., 31.7–49
Satellite uses in meteorology
Kondrat'yev, K. Y., 31.10–62
Murayama, N., 31.9–38
Sabatini, R. R., 31.3–63
Stewart, K. H., 31.5–83
Winston, J. S. (ed.), 31.10–70
Satellite uses in oceanography
Apel, J. R., 31.8–35
Bender, E., 31.12–58
Doerffer, R., 31.7–561
Dunne, J. A. et al., 31.4–42
Huang, N. E., 31.10–59
Intergovernmental Oceanographic Commission, Paris, 31.8–487
Kuftarkov, Yu. M. et al., 31.12–593
La Violette, P. E. et al., 31.7–550
McClain, E. P., 31.7–551
Nelepo, B. A., 31.8–40
Strübing, K., 31.3–85
Townsend, W. F., 31.8–45
Satellite uses in tropical meteorology
Houghton, J. T., 31.5–80
Satellite uses in water resources management
Barrett, E. C., 31.1–68
Satellite uses in weather analysis
Belov, P. N. et al., 31.6–61
Billing, H. et al., 31.6–62
Holl, M. M., 31.7–50
Kazakov, A. Ya. et al., 31.9–68
Seaman, R. S. et al., 31.10–67
Tracton, M. S. et al., 31.11–66
Yakubyak, B., 31.4–67
Satellite uses in weather forecasting
Billing, H. et al., 31.6–62
Holl, M. M., 31.7–50
Moore, J. G., 31.9–37
Muench, H. S. et al., 31.11–21

Seaman, R. S. et al., 31.10–67
Sharov, V., 31.2–72
Tracton, M. S. et al., 31.11–66
Zwatz-Meise, V., 31.6–78
Satellite VLF observations
Makita, K. et al., 31.2–413
Satellite whistler observations
Mikhaylova, G. A. et al., 31.8–147
Morgan, M. G., 31.7–479
Satellite X-radiation measurements
Rugge, H. R. et al., 31.1–291
Satelliteborne interferometers
Canada Weekly [Ottawa], 31.9–18
Satelliteborne lasers
Abreu, V. J., 31.1–25

Huffaker, R. M., 31.11–17
Megie, G. et al., 31.10–26
Satelliteborne radar altimeters
Brammer, R. F. et al., 31.9–472
Townsend, W. F., 31.8–45
Satelliteborne radiometers
Kimball, A. W., Jr., 31.9–36
Lauritson, L. et al., 31.4–43
Wilson, R. G. et al., 31.6–66
Woerner, C. V., 31.9–43
Saturn ionosphere
Waite, J. H., Jr. et al., 31.1–524
Saturn satellites
Van Allen, J. A. et al., 31.7–506
Saturn's atmosphere
Judge, D. L. et al., 31.7–501
Saturn's ionosphere
Kliore, A. J. et al., 31.7–502
Saturn's luminosity
Stevenson, D. J., 31.10–445
Saturn's magnetic field
Acuña, M. H. et al., 31.7–499
Prakash, A., 31.10–446
Smith, E. J. et al., 31.7–500
Stevenson, D. J., 31.10–445
Saturn's magnetosphere
Acuña, M. H. et al., 31.7–499
Fillius, W. et al., 31.7–503
Prakash, A., 31.10–446
Simpson, J. A. et al., 31.7–504
Smith, E. J. et al., 31.7–500
Trainor, J. H. et al., 31.7–505
Van Allen, J. A. et al., 31.7–506
Saturn's radiation belts
Fillius, W. et al., 31.7–503
Simpson, J. A. et al., 31.7–504
Saturn's rings
Fillius, W. et al., 31.7–503
Van Allen, J. A. et al., 31.7–506
Saturn's temperatures
Ingersoll, A. P. et al., 31.7–498
Saturn's upper atmosphere
Kliore, A. J. et al., 31.7–502
Scale height calculations
Hiller, H., 31.12–166
Scattering by aerosols
Antyufeyev, V. S. et al., 31.9–389
Badayev, V. V. et al., 31.12–133
Dave, M. et al., 31.3–156

Tashenov, B. T. et al., 31.7–135
Yakovlev, A. A., 31.11–141
Yueh, W. R. et al., 31.4–234
Scattering by cloud droplets
Shettle, E. P., 31.11–132
Scattering by particles
Lyubovtseva, Yu. S. et al., 31.11–456
Pollack, J. B. et al., 31.11–128
Quenzel, H. et al., 31.2–398
Veretennikov, V. V. et al., 31.5–271
Scattering coefficient
Corradini, C. et al., 31.9–392
Gorchakov, G. I. et al., 31.6–329; 31.6–463
Gorodetskiy, A. K. et al., 31.6–330
Johnson, R. W., 31.12–270
Scattering coefficient variations
Fitzgerald, J. W., 31.6–327
Scattering function
Antyufeyev, V. S. et al., 31.9–389
Pavlov, V. Ye., 31.8–216
Tashenov, B. T. et al., 31.7–135
Scattering of light through fog
Corradini, C. et al., 31.9–392
Scattering of polarized light
Kapustin, V. N. et al., 31.11–455
Scattering of solar radiation
Konovalov, N. V. et al., 31.12–275
Scavenging by cloud elements
Beard, K. V. et al., 31.12–391
Scavenging by precipitation
Davies, T. D., 31.1–418
Radke, L. F. et al., 31.5–413
Schumann resonances
Tran, A. et al., 31.5–168; 31.5–169
Scintillation
Wernik, A. W. et al., 31.3–426
Sea bottom investigations
Collins, M. B. et al., 31.2–515
Sea breeze effects on atmospheric pollution
Ogawa, Y. et al., 31.2–123
Young, G. S. et al., 31.11–142
Sea breeze effects on ozone
Parsons, C. L. et al., 31.6–108
Sea breeze studies
Schroeder, T. A., 31.11–238
Sea breezes
Kozo, T. L., 31.4–284
Sea crystal growth
Strapp, J. W. et al., 31.1–120
Sea fog formation
Harimaya, T., 31.11–338
Norton, J. G., 31.7–308
Pilié, R. J. et al., 31.3–348
Wessels, H. R. A., 31.5–379
Sea ice charts
Godin, R. H., 31.6–523
Zwally, H. J., 31.6–527
Sea ice conditions
Godin, R. H., 31.6–523
Iceland. Meteorological Office, 31.7–547
Koslowski, G., 31.8–484
Sea ice conferences
International Conference and Workshops on Iceberg Utilization for Fresh Water Production, Weather Modification, and Other Applications, 1st, Iowa State Univ., Ames, Oct. 2–6, 1977, 31.2–4
Workshop on Remote Sensing of Sea Ice, Wash., D.C., Oct. 16–20, 1978, 31.3–13
Sea ice data
Iceland. Meteorological Office, 31.7–547
Kelly, P. M., 31.12–562
United States Coast Guard, Wash., D.C., 31.4–517
Sea ice data processing
Walsh, J. E., 31.10–505

Sea ice distribution
Akagawa, M. et al., 31.7–544
Denisov, A. S., 31.3–523
Leont'yev, E. B. et al., 31.3–527

CUMULATIVE GEOGRAPHIC INDEX

Vol. 31, Nos. 1–12 (Jan.–Dec. 1980)

(2) PHYSIOGRAPHICAL REGIONS

(213) Tropical Regions, 31.1–122; 31.2–68, 235, 236; 31.4–164, 520; 31.5–36, 108; 31.6–14, 80, 226, 227 406, 424; 31.7–152; 31.9–120, 152, 157, 168, 211; 31.10–17, 512, 544; 31.12–12

(215) Hemispheres
(215–11) **Eastern Hemisphere**, 31.2–277
(215–13) **Southern Hemisphere**, 31.1–21, 230, 572; 31.2–221; 31.3–303; 31.4–297; 31.5–234, 352, 445; 31.6–162, 164, 375; 31.7–157, 179; 31.8–89; 31.9–301
(215–17) **Northern Hemisphere**, 31.1–338; 31.2–62, 81, 220, 238, 275, 355; 31.3-290, 296, 297, 405, 511; 31.4–193, 266, 267, 342; 31.5–318, 319, 320, 443; 31.6–109, 375, 415; 31.7–145, 174, 175, 176, 177, 241, 330, 578; 31.8–18, 89, 233; 31.9–68, 139, 201; 31.10–385, 505; 31.11–208, 218; 31.12–245, 307

(23) Mountains
(234.3) **Mountains of Europe**
  Alps, 31.1–19, 86, 235, 251, 262, 303, 316, 350, 366, 406, 453, 454, 455, 475, 476, 498; 31.2–202, 496, 503; 31.3-301, 317, 377; 31.4–6; 31.6–5; 31.7–399; 31.10–351; 31.11–366, 380
    Ewigschneefeld, 31.10–360
    Hintereisferner, 31.1–267, 420, 434, 556; 31.2–499; 31.5–255; 31.10–226; 31.12–558, 560
    Hohe Tauern, 31.1–62
    Kesselwandferner, 31.12–558
    Sonnblick Observatory, 31.1–49
    Stubacher Sonnblickkees, 31.12–559
(234.41) Apennines, 31.1–351
    Mt. Capellino, 31.1–396
(234.42) Carpathians, 31.1–314, 400, 408, 486, 488; 31.4–216, 224; 31.5–398, 458
    Cindrel Mts., 31.5–460
    Izvorul Muntelui-Bicaz Reservoir, 31.1–301
  Dinaric Alps
    Velebit Mt., 31.1–414
  Tatras, 31.1–300, 480; 31.8–162
(234.8) Urals, 31.7–292; 31.12–420
(234.9) Caucasus, 31.12–480
    Mt. Elbrus, 31.4–323; 344
(235) **Mountains of Asia**
(235.2) Pamirs, 31.9–339
(235.24) Himalayas, 31.11–433; 31.12–429
(237) **Mountains of North America**
(237.1) Rockies, 31.4–21, 538; 31.12–546
    Wolf Creek Pass, 31.2–92
  Sierra Nevada, 31.4–77; 31.10–99
(237.2) Appalachians, 31.5–563; 31.12–353
(238) **Mountains of South America**
(238.1) Andes, 31.11–221
(239) **Mountains of Australia, Oceania, Arctic, and Antarctic Regions**
(239.3) Alps, New Zealand, 31.3–355

(26) Oceans, Seas, and Interconnections, 31.1–56, 76, 199, 217, 334; 31.2–336; 31.3–33, 99, 332; 31.5–160, 325, 326, 484; 31.6–15, 139, 401; 31.7–4, 208, 226, 263, 264, 266; 31.8–167; 31.9–277, 283, 450; 31.10–20, 302; 31.12–331
(261) **Atlantic Ocean**, 31.1–237; 31.2–322; 31.3–299; 31.4–129, 191, 212, 555, 567; 31.5–592; 31.7–6; 31.8–36, 526, 527, 530, 553, 555; 31.9–475, 477; 31.10–244, 525, 528, 551; 31.11–59, 531, 547, 563; 31.12–354, 570
(261:213) Tropical Atlantic, 31.1–58, 59, 63, 172, 360, 391, 587; 31.2–30; 31.3–53, 75, 228, 354, 553; 31.4–24; 31.5–98, 107, 226, 229, 355; 31.6–51, 304, 411, 430, 559, 566; 31.7–43, 224, 249, 261, 287, 322, 594; 31.8–20, 219, 289, 557; 31.9–113, 311, 590; 31.10–49, 50, 52, 135,

237, 239, 280, 296, 323, 555, 562; 31.11–25, 50, 209, 296; 31.12–246, 299
- (261.1) North Atlantic, 31.1–462; 31.2–340; 31.3–238, 247; 31.4–273, 517, 557; 31.5–136, 235, 314, 446; 31.6–327, 432; 31.7–130, 547; 31.8–107, 234, 246, 549; 31.9–116, 446, 504, 516, 547; 31.10–6, 526, 563; 31.11–226, 556, 560, 562, 572, 585; 31.12–585, 590
- (261.2) Northeast Atlantic, 31.1–562; 31.2–519, 565, 578; 31.5–162; 31.6–548; 31.7–584, 590; 31.8–73, 543, 563; 31.9–29, 291, 451, 452, 468, 499; 31.10–514, 520, 556, 559; 31.12–50, 564, 565, 569
    - Gulf of Cadiz, 31.11–543
    - Iberian Basin, 31.9–584
- (261.24) Baltic Sea, 31.1–568; 31.2–536, 539, 587; 31.4–586; 31.8–484, 515; 31.10–538, 546; 31.11–201; 31.12–317
- (261.242) Gulf of Bothnia, 31.2–506; 31.10–546
- (261.243) Gulf of Finland
    - Neva Bay, 31.10–600
    - Neva River Estuary, 31.1–591
- (261.245) Central Baltic, 31.10–511; 31.12–318, 578, 579
